SECURE US HOLDS TOP 100 RANKING

May 19, 2010 – For the third consecutive year, Morgantown, West Virginia-based security firm Secure US has earned a spot among the top 100 security firms in Security Distribution and Marketing (“SDM”) Magazine's “SDM 100.” This is the fifth year that Secure US has held a spot on the list of America's elite security firms.

Founded in 1993, Secure US is West Virginia's premier alarm service provider, protecting the region with state-of-the-art electronic intrusion, fire alarm, and other systems for both commercial and residential properties. Secure US provides services to more than 10,000 customers throughout the region. It is the only West Virginia security firm to hold a spot in the SDM 100.

The SDM ranking is based on recurring monthly revenue, but also contains a ranking based on total gross revenue. Secure US is one of the few companies whose position in both rankings increased between 2008 and 2009.

With offices in West Virginia, Pennsylvania, Kentucky and Ohio, Secure US has grown in its 17 years of business. In that time, the company has learned that along with a good product, a good security firm must provide its customers with peace of mind through dedicated customer service.

ABOUT SECURE US
